A scoring option both inside and outside, Tyagi pops up for a basket quite consistently, and makes the most of his opportunities. A wing who holds his depth around the perimeter, Tyagi is certainly capable of knocking down a three-point shot regardless of the defensive coverage. He does not need long to get his feet settled, and can fire off a shot at rapid pace. When it comes

to his shot selection both in the paint and beyond the arc, he can sometimes bite off more than he can chew, so if he can improve his ability to get open with or without the ball, it will allow him to be more damaging from the field. Tyagi is a wing who offers three-level scoring and is not afraid to take big shots in the big moments, regardless of the defensive pressure.

A slashing wing, Choudhary is a solid off-ball option that can slot into any lineup due to his adaptable style of play. Choudhary does not need too much of the ball to make an impact, instead timing his cuts into the paint to perfection, allowing his man to be sucked into the cutting player and allowing himself to be an easy dish-off option. He also follows

in his teammates' shots, which often results in offensive rebounds. Choudhary consistently produces second-chance points, and has an excellent read of where the ball is going to fall. Given how many guards are in the draft class, a player that can thrive without the ball is proving increasingly valuable, and Choudhary fits the bill on that front.

Firstly, he can score at all three levels, boasting an impressive shooting motion and a confidence in his jumpshot that allows him to fire off field goal attempts before the defence can close out. As a catch-and-shoot option, Singh is deadly from range. The power forward also has an impressive motor that allows

him to march up and down the court fast enough to get on the end of some transition baskets. Once he is given an easy look at the basket, Singh is also not afraid of throwing down a dunk, which will excite crowds in a big way. In terms of local frontcourt players, Singh has the capability to be the most impactful when the competition starts, showing an array of offensive skills that will help him land early minutes.

Kushal was a standout prospect at the combine, recording the second-best physical performance rating with an impressive score of 82.5. He ranked first in the Standing and Maximum Vertical Jumps, exhibiting explosive jumping ability. With an impressive 210.5cm wingspan, Kushal has all the attributes to defend at an elite level. Offensively, Kushal is a tall wing who possesses a natural shooting stroke, capable of hitting shots

from deep even with defenders in his face. Once in his shooting rhythm, he becomes nearly unstoppable for defenders. Standing at 195cm tall, Kushal has a tight handle and uses it to create open spaces for shooting. When defenders close out, his height and athleticism allow him to shoot over them. A natural scorer at heart, Kushal could benefit from finding the open man as help defenders sag off their assignments to double-team him.

A hard-working wing who does a lot of things off the ball, Singh' efforts may go unnoticed, but they help his team thrive on the offensive end. He is capable of setting up the play off the dribble, but often holds his width on the wing to provide an option on the perimeter. He can move well with the play and adapts his efforts to the pace of the match as it rolls on. Although he does stay in the right spots, Singh

could be more involved offensively, and can go missing at times if the ball does not make its way to him. He may need to improve his ability to inject himself into a contest if he is to thrive at INBL level. With the ability to make a deep shot and a high workrate, Singh could be a an off-ball player that has a high impact, no matter the amount of opportunities.

A combo forward that brings plenty of interior presence to the frontcourt, Tomar is an excellent finisher at the rim and should adapt to the scoring of the competition. Often looking to get basket-side of his defender, Tomar can expose the opposition if given a good look at the hoop. When looking to score at the rim, he is evasive of the defender in front of him, and gives himself the best opportunity to find the bottom of

the net. He has shown the ability to finish over the opposition, but is also crafty at creating space, utilising pump fakes and smart footwork to evade the arms of the defence. Tomar has a strong feel for how the opposition is guarding the basket, and adjusts accordingly. He can also cover the court at a solid pace, allowing himself to get open in transition for some easy baskets after a rebound or turnover.

A lengthy wing that works extremely hard for scoring opportunities, Singh is energetic whenever he is on the floor, and loves having the ball in his hands. The 22-year-old holds his depth well, always looking to get the ball at the perimeter as he aims to create three-point scoring opportunities. Although he does not produce the most field goal attempts, his movements without the

ball show promise as an off-ball threat. Singh does float in and out of games, and can go missing at times, so he will want to make himself a more consistent contributor if he is to become truly damaging on the offensive end. A wing who stays wide and remains an option on the perimeter at all times, Singh could be an option as a development player given the potential he shows.

Boasting impressive height, Sharma is a big man that is certainly capable of impacting the scoreboard whenever he is on the court, playing to his strengths and getting his hands on the ball in good spots. Standing 202cm, he is hard to miss on the court, and can make his presence known on both ends of the floor. He has an impressive vertical leap that allows him to crash the boards both offensively and defensively, and he boxes

out well to match. He could be an even bigger threat inside, but he sometimes loses possession close to the basket. If he can add a bit more touch and class to his inside scoring game, he could add significant value to his output on the offensive end. Sharma certainly catches the eye with his strong vertical leap and ability to find the ball deep in the paint, and if he can add more scoring power, could be a serious two-way threat.

One of the most offensively productive big men on the board, Mathur will make an immediate impact if selected in the INBL Auction. He has a knack for getting himself in the right position for easy baskets, making life simple for his teammates by allowing them to make elementary passes to find him open underneath the hoop. If the defence looks to put pressure on him at

the basket, he times his shot attempts well enough to create enough space to still put up a high-percentage shot. Mathur also has the ability to hit shots from range, making him perfect for the modern game. Mathur is certainly one of the best frontcourt prospects in the draft in terms of offensive output, and could be a starter when the competition begins.

An athletic combo-forward, Mathew can score at all three levels with ease, boasting an impressive offensive bag that helps him contribute in a big way offensively. Mathew is an explosive athlete that uses his verticality to rise above the interior defence and score at the rim. He can also shoot the ball well from both mid-range and three-point territory, making him a dangerous

scorer. The 24-year-old also has an excellent wingspan of 210cm, giving him that extra reach when finishing close to the basket. He could be one of the best offensive wings in the competition if given the opportunity, and is certainly capable of getting to his spots.

A hard worker off the ball, Sumanth does the team things to make an impact whenever on the court, and would be a coach' dream given how many unnoticed things he does. Whether it is setting off-ball screens, drawing a defender to make space or directing his teammates to scoring positions, Sumanth does not need the ball in his hands to create something for his team. When he does have possession,

Sumanth is capable of creating his own shot by working around screens to create separation from his defender. A solid mid-range shooter, he looks comfortable rising over the defence and taking a jumpshot with an impressive shooting mechanic. The wing does all the right things as a team player on the basketball court, and when given his opportunity, can knock down a shot as an offensive option.
